I believe that everyone is not too familiar with the Auchan brand. In fact, it is a sub-brand launched by Changan. **Changan Auchan X7 (Configuration | Inquiry)** is its first compact SUV. This model has become the choice of many consumers with the characteristics of "low price, large space and close to the people".

However, the Auchan X7 models have quality problems of varying degrees, and many car owners have also complained through different channels, hoping that the manufacturers can reply as soon as possible. We learned from the car quality website that the main problems of the Auchan X7 are that the taillights cannot be fully illuminated, the one-button lift of the windows fails, and the abnormal engine noise.

According to some informed car owners, they have encountered many problems when using the Auchan X7, one of which is that the taillights cannot be fully lit. The rear taillights of the Auchan X7 only have two peripheral lights on, and the lights on the tailgate are not bright, which

We learned from the car quality network that the engine and gearbox problems account for most of the quality problems of the Auchan X7. Several car owners have revealed that the Auchan X7 engine shakes violently at cold start, the hot car sometimes knocks, the gearbox sometimes does not respond to refueling, and the fuel consumption is high and low frequency resonance.

As we all know, the **Changan Auchan** X7 is equipped with a 1.5T Blue Whale engine with a maximum power of 178Ps and a peak torque of 265N m. In addition, the engine is matched with a 6-speed manual and a 7-speed wet dual-clutch gearbox, and the 7-speed wet dual-clutch is the main sales model of the Auchan x7.

Consumers who are familiar with dual-clutch gearboxes know that the unreliability of dual-clutch gearboxes is always at the top of the list of gearbox problems. Some car owners even talk about dual-clutch gearboxes and dare not start.

The dual-clutch gearbox on the Auchan X7 has broken the hearts of some consumers. Although from the perspective of power parameters, the book data of Auchan X7 does lead the same level, but if you blindly pursue large power parameters and ignore smoothness and reliability, it may be difficult for car owners to use it without worry. After all, who spends 100,000 yuan to buy a domestic SUV, who is not looking for "high quality and low price"?

In fact, the problems of the Auchan X7 are far more than those mentioned above. They are all facing these problems. If the manufacturer can handle it properly in a timely manner, I believe that most car owners are willing to communicate with the manufacturer. However, we found that Changan Auchan's manufacturers don't put car owners first. At present, on the car quality website, we learned that the car owner ignored it after complaining to the manufacturer. The owner said bluntly: This is consumer fraud and asked for a recall.

As the star model of Changan Auchan, the Auchan X7 sold more than 10,000 units in one month when it was just launched, reaching 11,086 units, and it entered the top ten domestic sales of self-owned compact SUVs. It stands to reason that the manufacturers of such an explosive model have high hopes, but only about 4 months after the launch, the number of complaints of the Auchan X7 has increased sharply. What makes it even more difficult for car owners to accept is that, in terms of after-sales, the Auchan X7 also has problems such as sales fraud, inconsistency with publicity, unfulfilled sales promises, poor personnel skills, and new problems, all of which appear on this model.

For example, there is feedback from the car owner in the after-sales service. After the car owner found the problem, the after-sales service of Changan Auchan said that everything was normal, and the master heard the abnormal noise when testing the car. It takes a few seconds for

the gearbox to go. The second gear and the first gear are sometimes clicked. The after-sales maintenance master said that this is normal, and the problem has not been solved since the new car.

In fact, the small problems on the car are not only found in the Auchan X7, but also in many models of different brands, but Changan Auchan's unresponsive attitude can be said to be very disappointing. In fact, most car owners' demands are very simple. In order to ensure their complete car experience, I only hope that the manufacturer can find the root cause of the problem as soon as possible and solve this problem completely. Therefore, if a car wants to sell well, it is not only about its appearance and cost-

effectiveness, but also whether the quality of the product can make consumers feel at ease.

comment **Big cat with white ears** in Xi'an, Shaanxi

Changan's cars are always worrying. There were various problems in the past, which led to the lag behind Great Wall Geely. Now if there is a problem with the Blue Whale, the cs75plus will make people worry again.
