Information display and meter

Meter

The meter is also available in the speedometer, and fuel gauge.
Power mode is ON will be displayed when the mode.

■ Speedometer

The running speed km/h will display at.

■ fuel gauge

Show me remaining in the fuel tank, the amount of fuel.

■ tachometer

It will display the number of engine revolutions per minute.

1 fuel gauge

Advice

The fuel gauge once close to, to go refueled early
Please.
Engine're not ignite fuel when there is no
Ri, you may damage the catalytic converter.

And the remaining amount of fuel actually, the amount that is
displayed is different

1 tachometer

Advice

Limiting speed it can cause engine failure
Greater than or equal to the number (red zone) and driving so
that does not enter the
In particular, when shifting down to the high speed running
, Please note.

The select lever **R** And when, then the sky Bekasi
When was, and times lower than the limit rotational speed of the
rotational speed, and fuel for transmission protection
Supply fee will be stopped.

Before operation

Preparing for operation

Please check the following items before you start driving.

■ Items to be checked outside the vehicle

- Whether there is unobstructed view of the mirror or window, the light of the lighting device class ?
 - u I Remove any frost, snow, ice is attached.
 - u If the snow is piled up on the roof, it is possible to cut off the view to slide down during travel.
 - I remove because there is sex.
 - If you are freezing, please remove ice from melting.
 - u If the ice is attached to the undercarriage, being careful not to damage the parts.
 - Remove.
- Bonnet or are completely closed ?
 - u hood opens while driving, it is dangerous out of view.
- Tire or normal ?
 - u I make sure there is no abnormal wear air pressure, cracks, or damage.
 - 2 inspection and maintenance of tire P.213
- Whether or not the children around the car ?
 - Do not obstacles around the car ?
 - u or blind spot which is not visible from the driver's seat, blind spot that can not be confirmed in the rear view mirror There Since vinegar, make sure before you ride.

■ Items to be checked in the car

- floor mat is either not caught in the pedal ?
- floor mat is whether it is fixed ?
- Do not overlap the floor mat ?
 - u It is dangerous there is a risk that can not be reliably operation of the accelerator and brake.
- Do not place anything on the foot of the front seat ?

1 check items outside the vehicle

Advice

When the door is frozen, it is not stripped by force

Please dissolve over hot water.

When you peel off forcibly, rubber door around peeling

You. After you put the hot water, and to prevent freezing,

Please wipe the moisture well.

The key hole in the door, and Do not spray a hot water

Sai.

2. while the parking brake, release the brake pedal, Akuserupeda
I tread slowly Le.
u can sure that electronically controlled parking brake warning light is off
Have.
u If you have not installed the driver's seat belt, electronic control parking even when starting
Brakes are not automatically released.
2 electronically controlled parking brake P.170

1 operation at the time of start

C

While stepping on the accelerator pedal, select the bar.
It may cause an unexpected accident with sudden acceleration.
Cancels the operation of the parking brake switch when starting
In the case of downhill, without going the accelerator pedal
When you manually release the parking brake, You can be start smoothly Ri.

■ Hill start assist system

When you start from the steep, after releasing the foot from the brake pedal, the brake system does not work with a gentle slope
About the null force 1 and system to mitigate the backward movement of the vehicle by retaining seconds, to facilitate starting
Is.

1 Hill start assist system

Notes at the time of running

■ When the fog came out

visibility will be poor when the fog came out. Lights down in the headlights day time
Then, it may be used as a reference, such as tail lamp center line, guardrail, the previous vehicle, the speed
Please travels when dropped.

■ When the wind is strong

When the car is such that flowed into the next strong wind, grip firmly on the handle, the speed
You rebuild the course by dropping gradually.
On the exit of the tunnel, bridge, of the bank, large trucks and running time of Kirideshi shaved the mountain
In such overtaking of, for susceptible to crosswinds, especially, I will continue to care
Please.

1 Notes at the time of running

Please do not turn off the engine while driving.
It is dangerous. Look like the following.
• Since the booster of the brake does not work, parts
Effectiveness of the lake is poor
• Power unit of the power steering is activated Na
Fried steering becomes heavy
The select lever while driving [N] The Do not in
Sai.
Kirideshi shaved the mountain
Engine brake is not effective at all, an unexpected accident
It may cause.

When you want to move the car, start the engine always
, Please.
And moving using the downhill, unexpected accident
It may cause.

1,000km until you run, drive system and engine
Avoid sudden acceleration for the protection of, the sudden
Acceleration, and Na.

■ when it is raining is

Because the road surface is slippery, sudden braking, sudden acceleration, abrupt steering during wet weather. Please drive carefully than usual to avoid. The Ya cause hydroplaning phenomenon where it may be exposed to stagnant water such as rut. Will be easier.

Please do not run deep puddles and flooding road. The destruction of the drive system and engine. There is a risk that lead to failure loss, of the electrical component.

1 when it is raining is

Please note hydroplaning phenomenon. The hydroplaning phenomenon, the road surface with water. When traveling at high speed where it is capped. In the film of water can be between the road surface and the tire. The brake and the steering become ineffective. I will say that the state of that.

I continued on next page

■ Additional Notes

When traveling, it receives a strong shock under the floor, which may lead to accident.
For leakage of fuel or brake fluid, to each section and parked in a safe place immediately.
Please check whether there is any damage.

1 Additional Notes

C
The vehicle speed during the shift down, and
Careful
The road surface slippery, rapid and engine
When the lake leads to tire slippage
You Ri.

Advice

Just repeat the steering when the extremely low speed and
The you can, etc. and holds it apply force to the handle
The EPS (electric power steering) system
Temperature rises, the path for system protection
Because it limits the function of the word equipment, hand
Le operation will gradually heavier.
It returns the temperature of the system is down, but Shea
The intermittent how to use stem protection, such as work
When repeated basis, it becomes cause of a system crash
You.

For automatic

■ creep phenomenon

when the engine is running, the select lever is in the non-creep position (P or N). How you are in the non-creep position, the ready to force connected, and not step on the accelerator pedal due to the creep phenomenon. Also, the car begins to move slowly.

1 creep phenomenon

Creep phenomenon is strongly engine speed is increased. Will. When the engine speed is raised, it Burekipe Please stepped firmly Dar.

When the vehicle is stopped on the uphill, and forward due to creep phenomenon, more of the force tries to retreat is large. As soon hear, there are times when the car is retracted. Depressing the brake pedal, parking brake Please over.

■ kickdown

The select lever is in the D or S position. At it depresses fill the accelerator pedal while driving, The engine speed rises and the speed ratio is changed automatically to obtain strong acceleration. I can.

1 kick-down

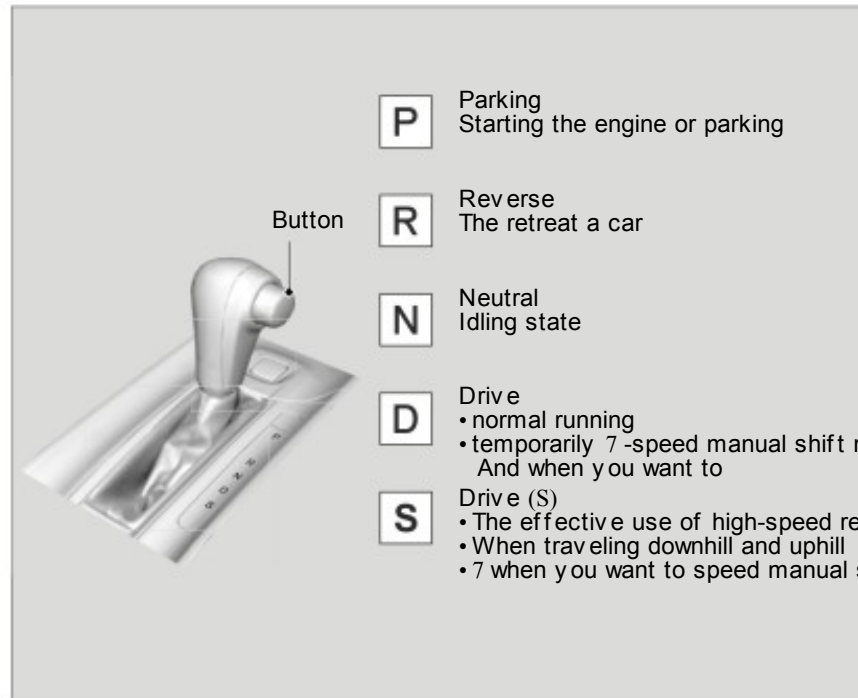

That it depresses the accelerator pedal, such as uphill. Come, the engine speed suddenly by kickdown. It rises, the speed is too out There Be. Please operate carefully accelerator pedal. The curve or slippery surfaces, especially attention 必 Is required.

Shifting operation

7 -speed manual shift mode vehicles

You can switch the selector lever in response to the running state.

■ Names and Functions of the select position

1 shift operation

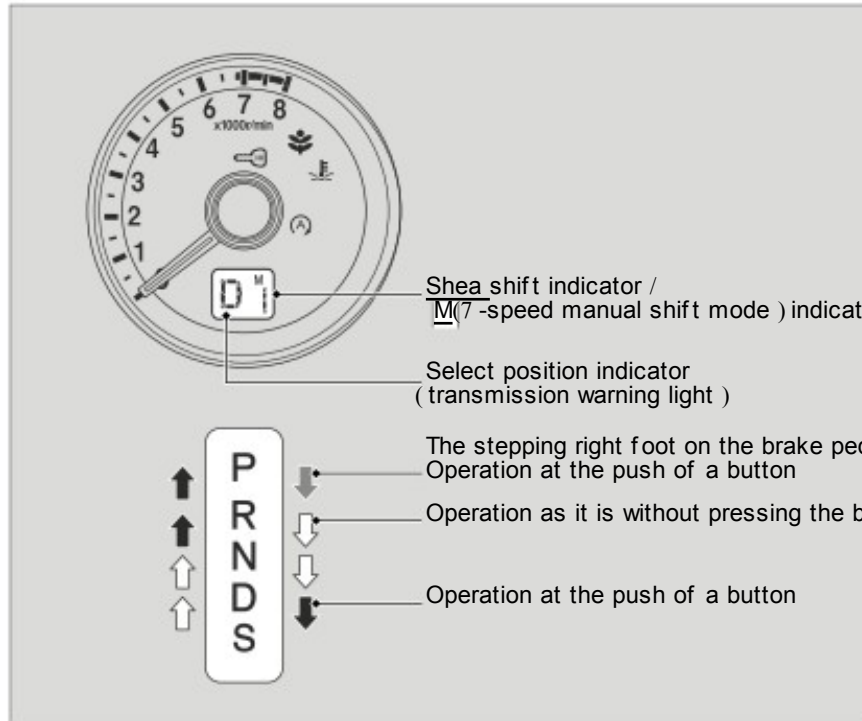

The select lever **P** When the non-power Mode is OFF does not take mode.

R When, and Sele to the driver chime sounds Is Kutoreba **R** The Shirasema that it has entered into Be.

N Even when, when the engine is cold Due to the viscosity of the transmission fluid, Sometimes the car starts to move slightly. The stepping firmly on the brake pedal, respond to need Please parking brake is Flip.

■ operation of the select lever

Select position, in conjunction with the selected position indicator in the meter section, then, the selection is indicated by the lighting of the lamp display the current position.

Shea shift indicator / M(7-speed manual shift mode) indicator

Select position indicator (transmission warning light)

The stepping right foot on the brake pedal, Operation at the push of a button

Operation as it is without pressing the button

Operation at the push of a button

1 operation of the select lever

advice

A car when the retreat from the forward, to move forward from the reverse completely, the back while stepping on the brake pedal. Please operate the Rekutoreba. The Misao the lever in a state in which the car is not completely stopped. When you create, you can damage the transmission. There you have it.

When the car to start, and accidents due to misunderstanding. Also select position indicator in order to avoid. Please check the position of the select lever.

Transmission warning light flashes while driving. If it is, it is an error in transmission. There are. Avoid rapid acceleration, Honda and have it inspected by dealer. Please.

Brake and hold down the select lever button. If the pedal is pressed, the operation of the select lever. You may not be able to have. Please step on the brake pedal before.

The outside air temperature is very low (minus 30 degrees or less) and. It switches the display of the select position. It may But a little late. And always before traveling. Please check the select position.

I continued on next page

■ 7 -speed with manual shift mode

Shift switch on the handle, manually without removing your hands from the steering wheel and 1-7 Hayama You can at to speed. Pulling the shift switch while driving, 7 -speed manual I will switch to the shift mode. Even when engine braking is required, use , Please.

■ the select position [D] When the Temporarily 7 it becomes speed manual shift mode, shift indicator lights Be.

When it comes to the state of acceleration and constant speed running, 7 -speed manual shift mode is automatically canceled Will be. In addition [±] Shift switch (right side) and released also be Hikitsuzukeru few seconds You can be.

Such as the front of the curve, it is useful when you want to slow down temporarily .

■ the select position [S] When the 7 it becomes speed manual shift mode [M] Shift indicator and indicator lights Will.

When the vehicle speed drops without operating the shift switch, Shift mode automatically slow stage sequentially Down and if you stop one and then shifted down to the speed.

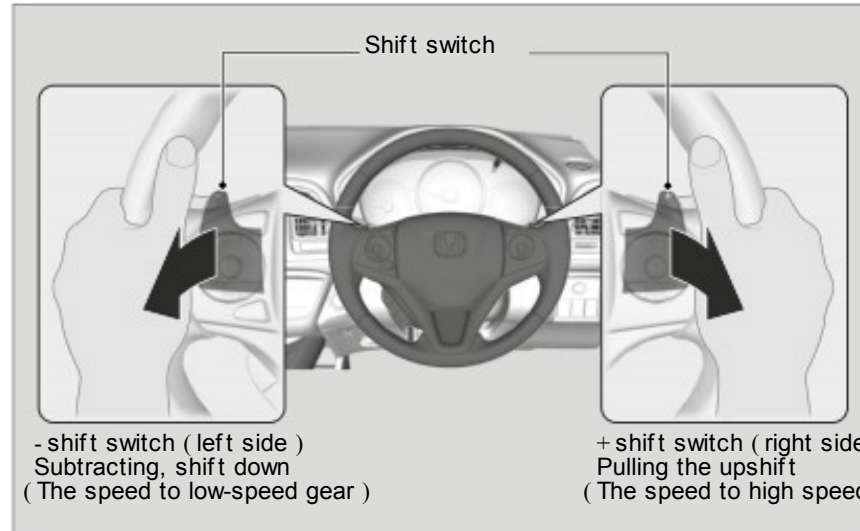

The engine speed limit rotation speed vehicle speed increases (red zone) approaches, automatically To 11 will stage shift-up.

Start is one that you can only be done with speed.

To cancel the mode, the select lever [S] From [D] Please move on. 7 -speed manual shift mode is canceled, [M] Shift indicator and indicator Turns off .

■ 7 operation speed manual shift mode

1 by the shift operation of the switch times, gear 1 and gear shift stage.

1 7 operation speed manual shift mode

When you operate the shift switch, a picture of post-operation
If the engine rotation speed is outside the acceptable range,
the engine light will flash without fast.

In order to protect the engine, and automatically shift
You may want to shift down or up.

I was operated the shift switch in slippery road
When, if the tire such that the lock, 7 -speed
I return to the normal running from the manual shift mode
There is a case.

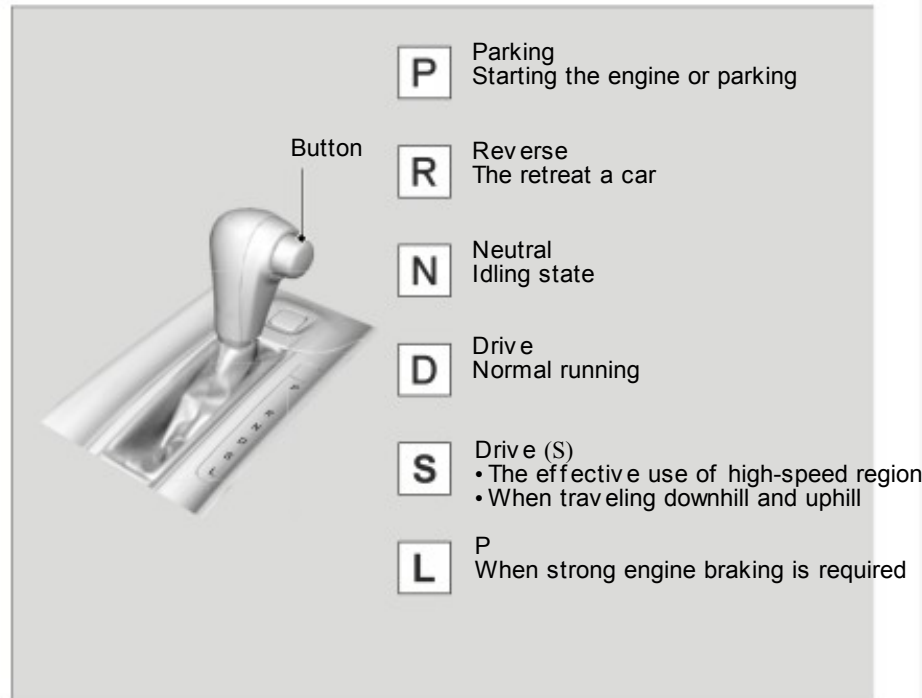

When you operate the shift switch at low speed DOO
To protect the lance mission, without shifting
It may display light flashes.

Shifting operation

7-speed manual shift mode vehicles with

You can switch the selector lever in response to the running state.

■ Names and Functions of the select position

1 shift operation

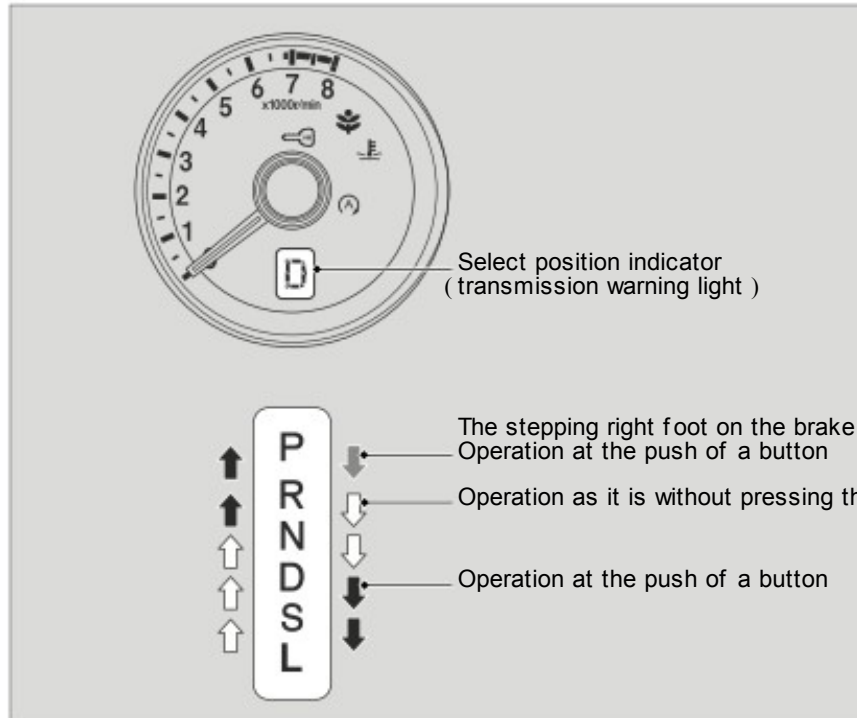

R When, and Sele to the driver chime sounds
Is Kutoreba **R** The Shirasema that it has entered into
Be.

N Even when, when the engine is cold
Due to the viscosity of the transmission fluid,
Sometimes the car starts to move slightly.

When strongly depressed the brake pedal, the brake is to work more strongly
You.

Brake Assist is activated, the pedal moves or little by little, the operation sound is heard
You may want to or. This phenomenon of when the brake assist is working
At This is not a malfunction. Please continue to depress the brake pedal strongly as it is.
2 VSA (Vehicle Stability Assist) P.169

Emergency stop signal

Emergency stop signal, very that the vehicle is multiplied by the sudden braking 1 Emergency stop signal
 Low the possibility to inform the following vehicle flashing indicator is flashing rapidly, automatically, it is a rear-end collision
 It is a system that reduced. 60km/h to slam on the brakes when the vehicle is traveling at high speed, add
 I will work with.

■ Mechanism of working

Emergency stop signal, stops working is to become the state of the following
 Be.

- When you release the brake pedal
- ABS when the stops
- When it is no longer in the rapid deceleration
- the hazard switch ON when you have to

Emergency stop signal, rear-end collision
 Being system for reducing the risk of being, add
 It does not completely prevent a collision. To operation
 Rutoki avoid unnecessary sudden braking, safety luck
 Please try rolling.

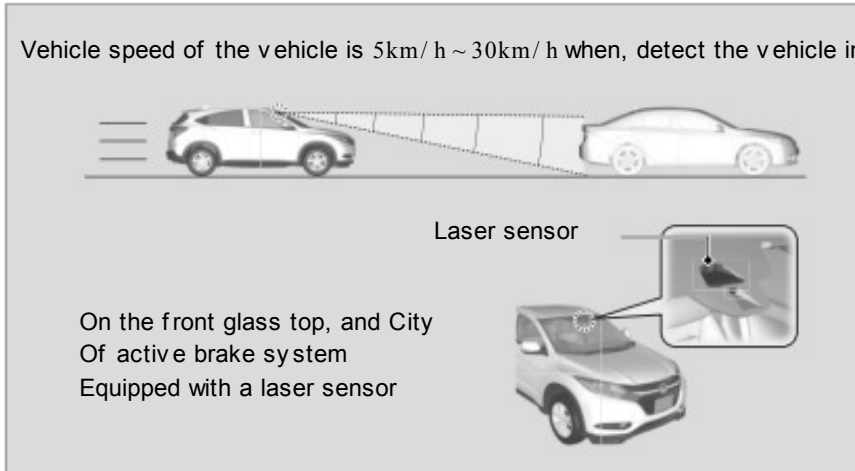

Hazard switch is ON when the, Emaje
 Tion Sea stop signal does not work

ABS when not working a certain period of time, system
 There is a case-free does not work

City brake active system

Running at low speed, and there is a possibility that the vehicle is hit from behind, City brake active system is almost in front of the vehicle. To come, to light the impact of the collision and to support the brake operation of the driver, you can help collision avoidance. It is a device that reduced.

■ system operating conditions

The speed difference between the vehicle 5km/h ~ 30km/h there is a risk of collision of the vehicle. In, automatic brake system is activated.

After the system is activated, the vehicle has stopped, the automatic braking is canceled. For safety reasons, please step on the brake pedal as necessary.

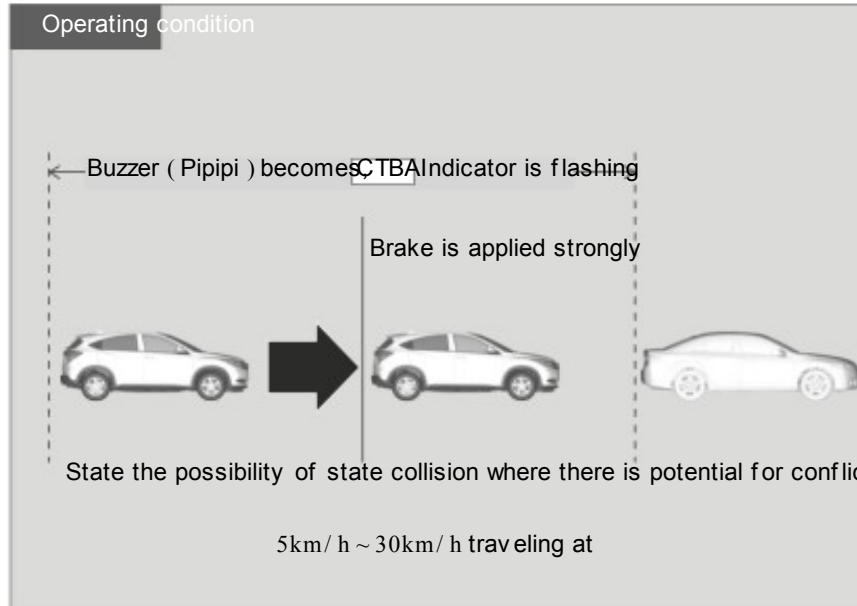

W

City active brake system, Oh
In the system can avoid a collision with Rayuru situation.
If the laser sensor detects such as collisions and not operate correctly, it is likely to lead to serious injury or death. There is.

In an attempt to avoid a collision, the driver brake. Such as when the user operates the handle or, the system. But it will be released.

■ how the operation of the system

For each state, the system operates as follows.

By the system, the car has stopped, CTBA Indicator light 10 will flash for a few seconds.

1 City brake active system

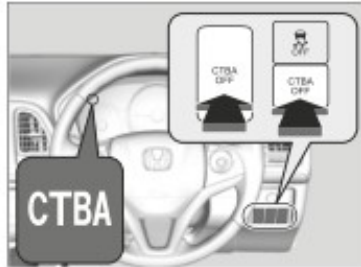

In cases such as the following, can be correctly detected vehicle, the system might not work.

- vehicle in front if diagonally, horizontally, of the opposing At, when it is difficult to detect the vehicle
- distance to the vehicle in front is when the extremely short
- the relative speed difference between the vehicle in front and the vehicle is large
- another vehicle interrupt in front of the vehicle, a steep decrease went the speed
- performs a rapid acceleration, it is close to the vehicle in front
- when the oncoming vehicle jumped out suddenly in front of the vehicle
- when the vehicle jumped out suddenly in front of the oncoming vehicle, the car jumped out in front of the vehicle
- When was
- When the bad weather rain, fog, and snow
- When the road conditions such as a curve the vehicle ahead and are extremely dirty, Leh
- When difficult to detect weak reflection of Heather
- car, rotation of a special shape, such as car carriers
- Cars, motorcycles and such, the material of the object, the laser sensor detects
- When hateful

: by type and options, equipment is different.

I continued on next page

■ the system ON and OFF

CTBA OFF About a 1 by pressing seconds, the system ON
And OFF I will switch the.

City active brake system is OFF to
When I switched, CTBA Indicator is lit
You.

The running time of the previous OFF even after the parking again.
Automatically when starting the engine ON until it becomes
Be.

1 City brake active system

In the following cases, the system automatically stops
And, CTBA that the indicator may flash
Be.

- when it is bad weather rain, fog, and snow
- dust, mud, snow, ice, windshield top frost
When it is covered with such
- when the front glass is condensation

Be when the temperature of the sensor is increased, dirt
The sensor can not sensing correctly teeth vehicles

The, CTBA System is automatic indicator is flashing
Will stop.

How to stop the car in a safe place, use the air conditioner
Lowering the temperature of the car Te, the front glass
Please wipe off the dirt.

In a state where the system can operate, system
Tem will automatically return.

In the following cases, the system OFF , please to.

- Use free or roller chassis dynamometer
If you want to
- bad road, such as off-road that is overgrown with grass
The traveling and, and mountain road leaves like take
If you want to

■ The operation in the absence of the possibility of collision

Even if there is no possibility of collision, when the following will cause the system to operate. Be aware of the surrounding circumstances, please traveling.

- When traveling in close proximity to oncoming vehicle and vehicle in front of you at an intersection and overtaking
- to try to pass at such a rate that exceeds the speed limit and low narrow gate and gate
- When you
- When traveling on the road, such as a steel plate with a step, line, construction
- When traveling in close proximity to such signs and guardrails on the road side of the following ways
- when approaching the wall or vehicle when parking, etc., it is stopped

1 City brake active system

In order to operate the system properly, you must:

Please observe the.

- When you wipe the glass, the laser sensor does not impact
- such as dirt on the front glass top (including the frost and ice)
- (No) I get rid of when there is a

If the following cases, Honda , please contact your dealer.

Refueling

For the designated fuel

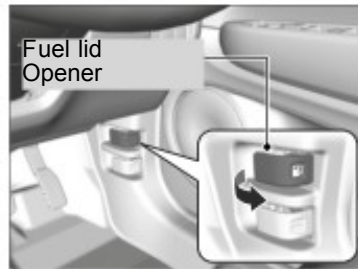

■ specified fuel

Unleaded regular gasoline
Regular Bio-mixed gasoline (E10 / ETBE22)

■ tank capacity

40 liter

How refueling

1. refueling machine petrol station on the passenger's side
To stop the car to come.
2. I stopping the engine.
3. fuel lid open the driver's seat feet
To open the lid and pull the toner.

1 for the designated fuel

Advice

Fuel specified non-fuel (gasoline bad, light oil, light Oil, etc.) you can replenish, using inappropriate fuel additive Please do not iodine.

There is a risk of conditions such as the following.

- damage such as the catalytic converter
- damage such as the fuel system and engine
- adverse effects on the engine, such as

That you use premium gasoline also

You can, but in this case, the engine performance of the original

It does not change significantly.

1 way of refueling

W

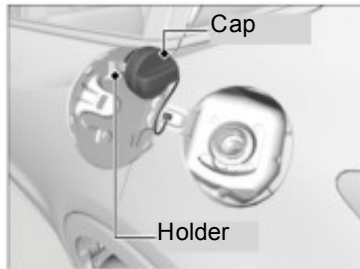

Fire is strictly prohibited refueling.

Well as some other fire for fuel vapor fuel or flammable there is a risk of explosion. It deals with fuel

, Please adhere to the following items is Rutoki.

- I always stop the engine
- flame, do not close the spark
- Do not breathe tobacco
- I do outdoors handling of fuel
- fuel spilled wiped off quickly

Precautions that have been posted on the petrol station within Please observe the section.

4. I open the cap.
I open the cap.

5. I bet the holder cap.

6. Insert deep into the refueling nozzle, you refueling
That.

u When it comes to a full tank, and automatic Stop of the fueling nozzle
Stop is activated, refueling stops.

W

Refueling work, open the fuel cap static of the body by touching the metal such as car body before kicking. Moth was vaporized by a spark from electrostatic Discharge that is flammable gasoline, it burns You Ri.

C

Is blown back from the fuel supply port is opened rapidly. There is a possibility that it may occur, become fire. Refueling, and carried out by only the person who discharge static electricity. When you return to the car during refueling, charging child there is a door. Again, ensure that you are discharged of static electricity.

If the sound of "shoe" is, the sound is stopped Please open slowly from waiting.

Please do not inhale fuel vapors.
If there that contain hazardous substances in fuel component You Ri.

I continued on next page

7. after refueling, hear a "click" noise is one I tighten the cap until it more than once way of refueling
u fuel lid will close it pressed by hand.

C

The automatic stop after the refueling nozzle, do not add supply
Fuel overflow due to changes such as temperature, fire
temporary become.

Make sure the cap is securely closed
To.
Fuel leakage when not closed, resulting in fire
There is a risk.

Honda and Do you do not use the cap of non-genuine
Sai.
If you do not use the genuine, you cause a fire
There you have it.

So that the fuel is not overflowing due to a change in temperature such as
temperature, fire
Automatic stop of the fueling nozzle works to leave
Has become a jar.

With additional supply to automatic stop after, fuel Mantas
You may enter the down capacity or more.

Remodeling and accessories

Accessories

If you are installing the accessories, please check the following items.

- Do not attached to the front glass accessories ?
 - u may swinging motion of accessories delay the situational awareness of the outside of the v ehicle.
In addition, fear that sucker is a function of the lens, leading to a fire There
Be.
- each pillar around the windshield, and front door glass, center, of the rear
Do not attach the accessories ?
 - u and it will prevent the operation of the side curtain air bag, it is evil to the above location
Please do not attach the Sesari.

Remodeling of the car

Honda and do not use the parts that are not suitable for non-genuine parts, functions and performance of the car, the quality,
Have. Was not suitable for the Honda and should use our genuine
parts

- band may not exert a proper functioning and performance, you can become a source of unexpected accident
Be.
Mark the following comes with the genuine parts.
- Honda If you install a thing of parts other than that has been reported to the Ministry of Land, Infrastructure and Transport, I in
violation cause.
- Please do not modify the car. The tampering, touching the law, of course,
You may cause an unexpected accident.

At the time of installation, such as a wireless device, be sure Honda please contact your dealer.
If mounting apparatus and method is not appropriate, it having an adverse effect on the electronic components
I There is.

Maintenance

In this chapter, I will not describe basic maintenance.

In front of the maintenance		Maintenance and inspection of the tire		Cleaning	
For inspection and maintenance	193	Inspection of the tire	213	Daily care	222
For safe maintenance	194	Tire rotation	215	Cleaning in the car	222
And Maintenance Guidelines	194	Winter tires	217	Cleaning the outside of the vehicle	224
Maintenance in the engine room		Honda smart key			
Maintenance items in the engine room ...	195	Honda battery exchange and handling of the smart key			
I open the hood	196	Conversion	218		
Recommended engine oil	197	Caring for air conditioning			
Supply of windshield washer fluid	197	Air clean filter	220		
Replacing the light bulb	198				
Maintenance and inspection of the wiper blade	200				

For inspection and maintenance

By the Road Vehicles Act, daily inspections and statutory inspection is mandatory for cars.

In the inspection and maintenance, please use safely and comfortable car.

That it is different from the usual (lack of sound, smell, of the brake fluid, after the car is on the ground

Etc. are) If you notice, Honda please have it inspected at the dealer.

For more information about the inspection and maintenance, refer to the separate maintenance notes as well.

■ the type of inspection and maintenance

■ Daily Inspection

It is the inspection, such as car wash, refueling and long-distance running before, it is at the discretion of your own.

■ periodic inspection

12 months and 24 is the inspection to be carried out on a monthly basis either. Those that are required by law, Honda Some specifies.

■ Other

There are inspection and maintenance at the time of the periodic replacement and free inspections, strict how it is used when the new car.

For safe maintenance

When performing maintenance, safety precautions and the following maintenance notes.

Please read carefully, please go to ensure the safety.

When it was carried out maintenance on customers' own, maintenance inspection

Please be recorded in maintenance records.

■ Safety matters for the equipment and place to perform maintenance

- for explosion prevention and fire, it is far from a gas or liquid flammable cigarettes, sparks, flames, Zakeru.

■ The safety matters about the car

- I pay attention to the toxic effects of carbon monoxide contained in the exhaust gas of the engine.
 - u please do adequate ventilation sure when you start the engine.
- I will be careful to burn due to parts that become hot.
 - u Before touching anything, please cool enough the exhaust system and engine.
- I will be careful to injury from moving parts.
 - The u, except when indicated, please do not run the engine.
 - u idling stop in, please do not open the bonnet.
- in the engine room, I note misplaced combustible materials or towel.
 - u There is a possibility that it may lead to unexpected accidents such as fire.

And Maintenance Guidelines

■ oil and parts to be used in the maintenance service

When you receive a maintenance service, Honda to use the oils and genuine parts

I recommend that. Honda genuine parts, High are identical to the parts that are used in car

Because it is manufactured on the basis of the quality standards, it is safe in terms of performance and durability.

W

Make the proper maintenance, and failure before riding to be no.

State and there is a fault during traveling, appropriate maintenance. If as some other serious cause an accident leading to death You.

Sure, that are described in this manual

The separate volume and Maintenance Guidelines gas of the engine.

The inspection period described in the maintenance notes.

Please observe.

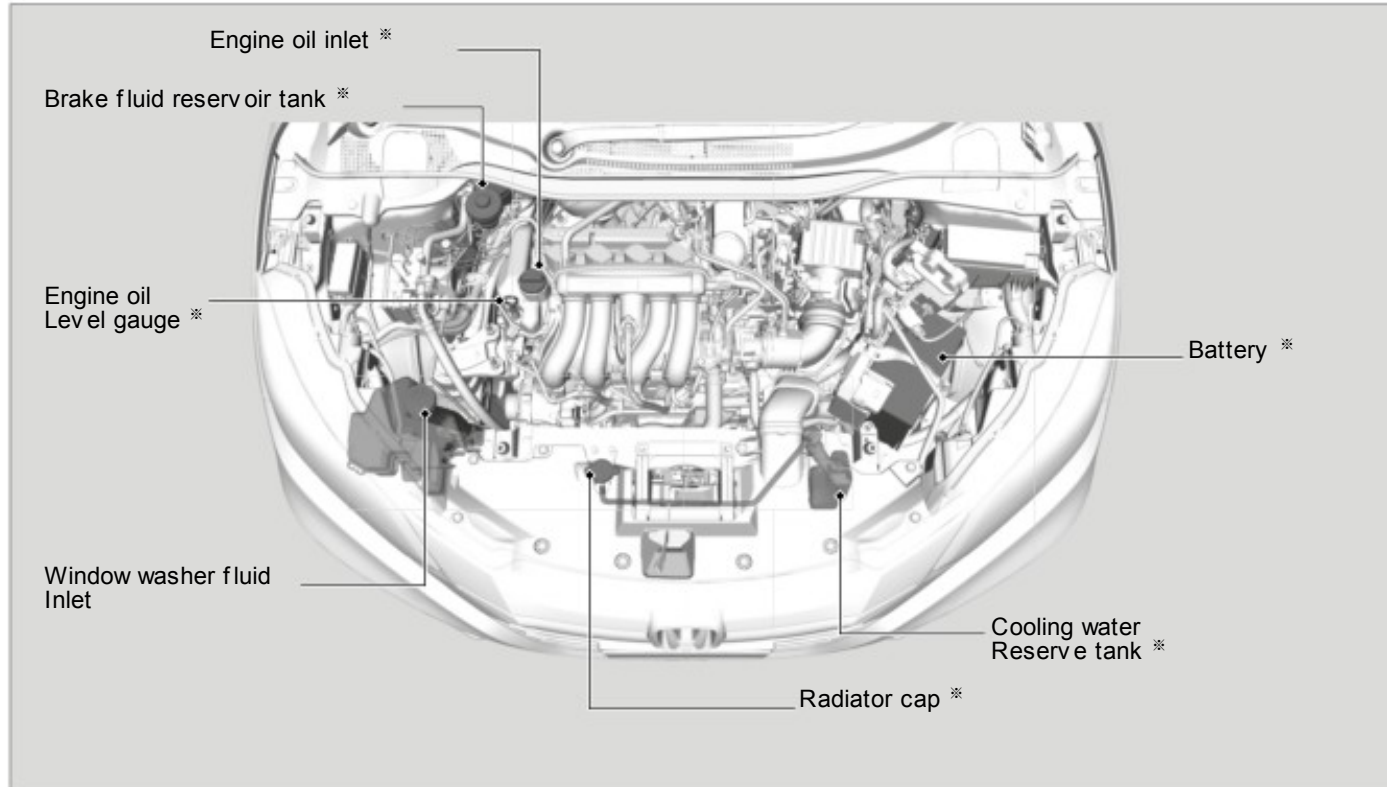

Maintenance, observe the instructions and warnings.

You do not abide by the instructions and warnings of maintenance, there is a risk of serious injury or death and.

Always, hands that are described in this manual Please observe the notes in the order.

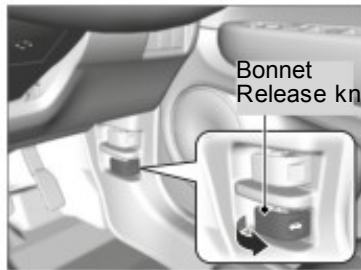

Maintenance in the engine room

Maintenance items in the engine room

※: For inspection and maintenance, please refer to the separate "Maintenance Notes inspection and maintenance".

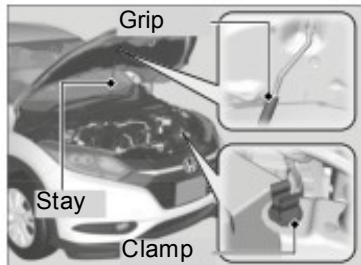

I open the hood

1. and parked the car, put the parking brake on. I open the bonnet
2. located in the driver's seat feet, hood release knob I draw.
u bonnet will lift a little.

3. locking mechanism by pressing the lever on the hood center.

Please do not use solvents of alkali resistance.

After using a chemical class, and with dry cloth
At Please wipe lightly.

On plastic parts, of cloth material as the cloth that was used
Please do not leave for a long time.

The liquid fragrance, and attach securely so that it does not
Please.

■ Caring for leather

Such as leather-wrapped handle, wool neutral detergent for 10% lightly included a soft cloth with an aqueous solution I dropped the Mase dirt. Then, wipe off a soap with a soft cloth dampened with fresh water Ri, dry and with good ventilation. Please wipe off dirt immediately when attached.

■ Cleaning the glass

Please wipe with such as glass cleaner.

Cleaning the outside of the vehicle

While applying enough water, and below, car wash, cleanses the underbody. Paintwork, while applying the water to near the bottom in the order from the roof, and soft brush, wipe the engine room, etc. I will wash with Rakaimono. If it is very dirty, water is dry and wash with mild detergent, and dropped from the detergent thoroughly with water. Wipe out that it is not Ka.

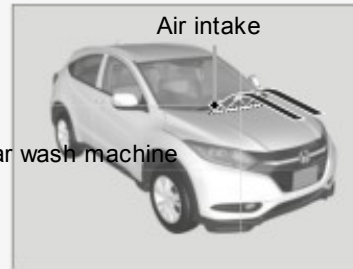

■ When using an automatic car wash machine

- I want to store the door mirror
- wheel cover equipped vehicles, do not use a dedicated wheel brush automatic car wash machine

■ When using a high pressure washer

- I adequate separation distance of the car body and car wash nozzle
- Because water may enter the chamber is too close, window around, particularly Is carried out with care
- Do not apply water to the engine room

Cleaning the outside of the vehicle
Wipe the engine room, etc. thoroughly
Please do not pour water.
This can be the cause of malfunction

■ When waxing

Wax, a month 1 please take when it is no longer repel water or times.

And after the car wash, go to to write when the body surface is lowered below body temperature.
Please.

■ Caring for resin painted parts such as bumper

The resin painted parts, gasoline, oil, radiator fluid, such as battery acid with

Coating and stains will cause peeling When you wear. In case of skin contact, and soft immediately.
Please wipe with a cloth had.

1 When waxing

Advice

Scouring powder (compound) wax-cored,
Please do not use. Fine scratches remaining painted surfaces

Might cause.

Wax Honda your genuine chemical supplies

Please.

1 Cleaning of painted resin parts such as bumper

If you want to repair of painted resin parts, Honda sales

Please consult the shop.

You damage the coating film using the inappropriate paint.

■ Cleaning the glass

Please wipe with such as glass cleaner.

■ water-repellent glass About

Seat window before (glass door) Yes coated water film is stuck on, and ashamed of water droplets
You can. You can wash, please wipe with a soft damp cloth.

There is that timing is bad water temporarily use a glass cleaner, but water

To return to the original if the wash. When the magnetic became worse, water Honda
Please contact us.

1 Cleaning the glass

The rear window, Anne and heating wire on the inside of the glass
glass line has been installed.

So that it does not hurt, with a soft cloth along this

Please wipe
of water droplets

There is a limit to the duration of the effect of repelling water
You! As observe the following in order to prolong the life of

Please.

Remove stubborn dirt such as mud, it is the opening and
cleaning
Please contact your dealer.

- scouring powder (compound) glass cleaner containing

Do not use wax or toner, detergent, etc.

- is not performed defrost, etc. in any metallic

- When using an automatic car wash machine, dirt such as mud
ahead

■ aluminum wheel care of

Aluminum hate dirt and salt. When seawater and road deicing agent is attached, and sports Please drop in early dirt soaked with neutral detergent to Range.

1 aluminum wheel care of

Please use the wheel of this car only. With the wheel of non-dedicated, parts and travel device Fear that interferes with the rake device There Be. Wheel exchange, Honda your dealer Please.

■ Cloudy headlights, the brake light

Due to the rain or car wash running, lamp headlights, and brake lights, the lens surface There is what someone cloudy temporarily. Also, the temperature difference between the outside air lamp, it is Sometimes lens inner surface condensation.

Hard compound and brush (abrasive) containing Do not use detergent, etc.. Tail or cause discoloration or spots, scratch There you have it.

In natural phenomena similar window glass and the cloudy and rainy weather in, this is a matter of function on There is no.

Also, you may be the structure of the lamp, water droplets adhere to the edge of the lens, but the function It is not a problem of the upper. However, the water in the large and if the water is accumulated in the lamp If the drop is attached Honda please have it inspected at the dealer.

■ Aqua Clean mirror care of

For improving the visibility of the rainy weather, parents spread as of the membrane raindrops on the mirror surface It is coated with a water effect.

1 Aqua Clean mirror care of

Advice Hydrophilic effect of the mirror will be lost, the following Please note the point. • Do not adhere to wax and water repellent on the mirror surface the following steps • oil film take-agent cloth or with a sand (a compound Etc.) Do not rub the surface with a mirror

■ recovery of hydrophilic effect

When the hydrophilic effect is lowered dirt is deposited on the mirror surface, and the following steps effect will be restored by performing.

1. then wash the mirror surface, and remove the dirt.
2. I wipe off with a clean cloth dampened with water.
 - u Use a mild household detergent or glass cleaner genuine if the dirt does not fall After washing, please wash with plenty of water.
3. 5-9 I shed sunlight on the mirror surface than time.

: by type and options, equipment is different.

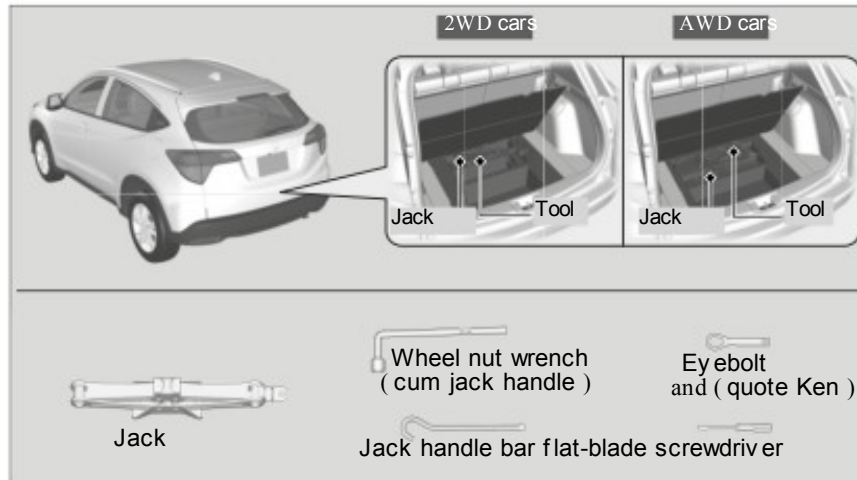

In the case of the unlikely event

In this chapter, I have described how to respond in case of emergency.

Tools, flares	229	Jump-start	245
When you punk	230	Select lever does not move	247
Emergency repair of a punctured tire	230	Overheat	248
Handling of the jack	240	Lighting of the warning light / flashing	249
Kake-kata of jack	240	Fuse

Checking the engine state	242	Inspection and replacement of the fuse	260
Honda is broken when the battery of the smart key ...	242	Tow	261
Engine stop event of an emergency	244	when the tail gate does not open	264

Tools, flares

The tool type

Warning flare

Use when you failed in hazardous locations such as highways and railroad crossings. I go sure that you check in advance that you carefully read the following, which are described in the flares Sai.

- How to use
- Usage Notes
- duration of flaming
- expiration date

2 flares P.2

One kind of the tool

Tooling now is housed in the cargo space Be.

1 flares

W

Used in the near flammable materials such as gasoline.

There is a risk of fire or explosion.

C

When you use the flares, it be noted that the following

- Please do not touch the children. Have It seems flares are ignited due Shifts were
- Please do not point to the face and body. It may cause burns or unexpected accidents.
- used because it bad visibility in the tunnel Please do not iodine. Within the tunnel Please use the hazard flasher.

When you punk

Emergency repair of a punctured tire

If tire damage is severe, you will need to tow the vehicle.

If there is a small hole in the tire simply, local dealer in order to repair the permanent damage. You can not use the kit. Honda also dealer

So that it can be operated to, tire puncture emergency repair of repairing temporarily damaged. Please contact the load service.

I can emergency repair kit.

When punctured, and speed over the brake gradually Grasp the handle

Please parked in a safe place dropped.

1. parked ground hard, it does not slip, where a horizontal, or the parking brake Kick.
2. the select lever **P** I put on.
3. to move the flashing emergency lights flashing, the power mode OFF to the mode.

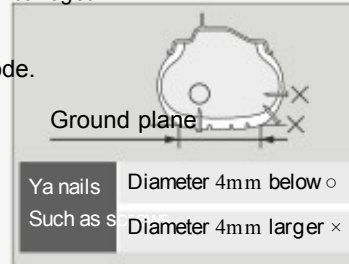

1 emergency repair of a punctured tire

In the following cases, emergency tire puncture repair

You can not use the kit. Honda also dealer

Please contact the load service.

- When the expiration date of the emergency repair agent has expired
- When you are punk or more
- about 4mm and punk with stab wounds and cuts of more than When the
- When you punk road surface ground parts other than the damaged

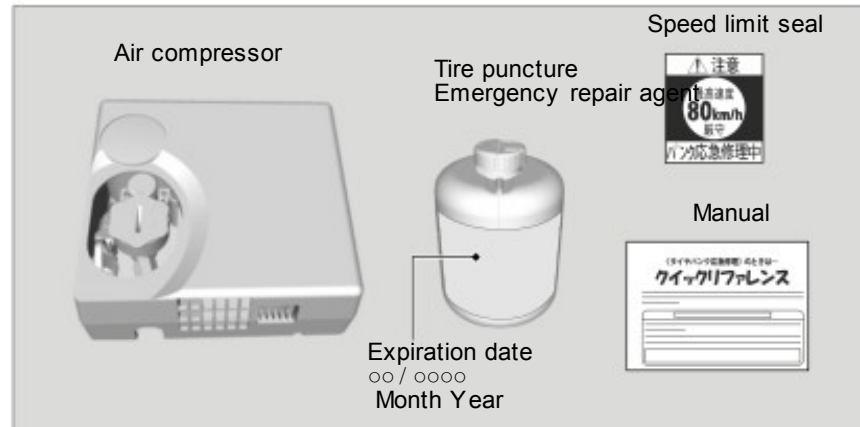

- when traveling in a state in which deflated almost
- when the tire is off the wheel
- when the wheel is damaged

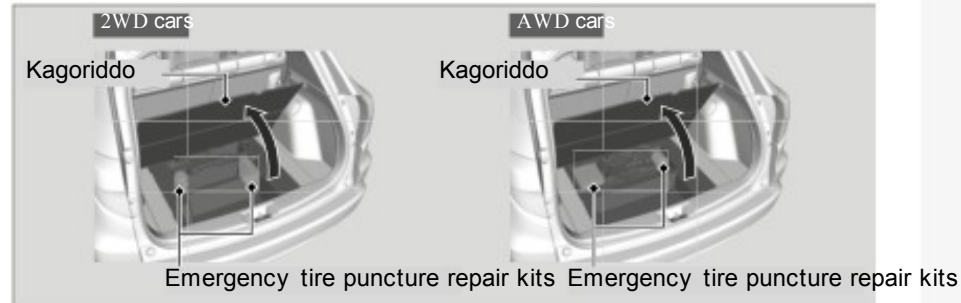

The Do not remove, such as nail stuck in the tire Sai.

If you would unplug, emergency repair kit tire puncture In some cases the emergency repair is impossible.

■ preparation of emergency tire repair

1. opened the Kagoriddo, take out the emergency tire puncture repair kit.
2. put horizontally kit to tire near you away from the traffic, it was punk.

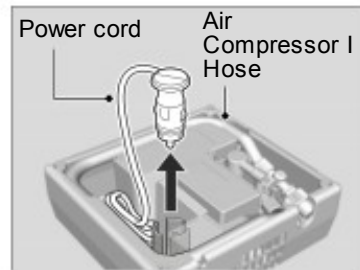

1 preparation of emergency tire repair

For a smoother emergency repair, tire pan
The more Read the instructions that come with the clock
Please emergency repair kit

I continued on next page

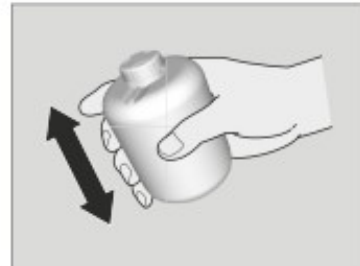

■ injection of air and emergency repair agent

1. I take out the power cord and the hose from the air conditioning air compressor.

2. I remove the air compressor cap.

3. I shake the bottle well of emergency repair agent.

1 injection of air and emergency repair agent

W

The Harmful drinking, for emergency repair agent, fatal contains a substance that can be a basis.

If you were drinking by mistake,

- I'm going to drink lots of water as much as possible
- please consult a physician immediately.

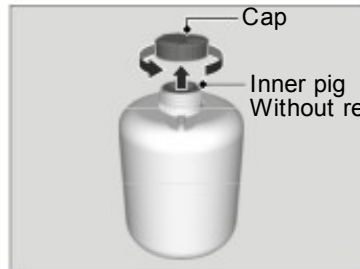

If you are attached to the skin or eyes

- Please wash thoroughly with water.
- The medical attention immediately if you feel something is wrong. Please response

So that it does not touch the child accidentally, storage, Please handle with care

Sealant capacity when the outside air temperature is below the freezing point. It may not flow in easily. I warm up in the car. Makes it easier flows.

Emergency repair agent adheres to the clothes, do not fall. Please note that there is it to lo.

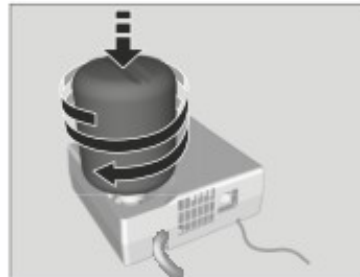

4. I remove the cap on the emergency repair agent

u Please do not remove the pig inside.

Without removing

agent of air and emergency repair agent
empty bottle injection is over air conditioning plexes
Please do not removed from the server.

Without removing the bottle, Honda specialist dealer or
Please bring to the repair shop.

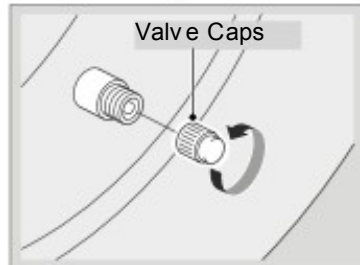

5. while it is with an inner pig of emergency repair agent

At, and screw air compressor to the bottle

Writes.

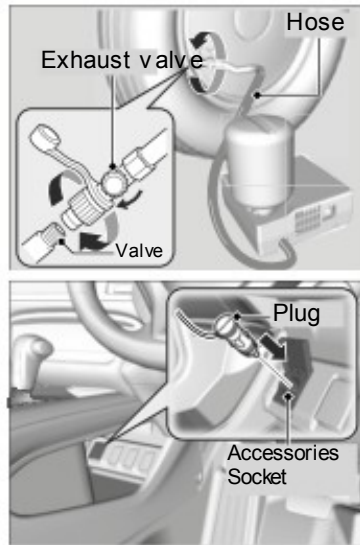

u screw firmly so that the bottle will not loosen

Please crowded.

6. I remove the valve cap from the valve.

I continued on next page

Inspection and replacement of the fuse

1. power mode OFF and the mode, head
All accessories and light OFF to
To.
2. the battery + the cover next to the terminal
Open.
3. I check the internal fuse.
 - u If you have a fuse that has expired, Honda
Please ask dealer for repair.
4. fuse box in the engine compartment A of
I remove the lid.
5. I check the internal fuse.
 - u If you have a fuse that has expired,
Pull out a fuse puller, even new
Please replace with the.
6. I check the fuse of a large room.
 - u If you have a fuse is blown, plastic
Remove the screw with a screwdriver, and also new
Please replace with the.
7. I check the fuse small room.
 - u If you have a fuse that has expired,
Pull out a fuse puller, even new
Please replace with the.

1 exchange and inspection of the fuse

Advice

If you replace the fuse larger than the specified capacity, Risk of damage to the electrical system will be higher. After replacing, so that it expires fuse immediately In these cases, Honda I will have it inspected by dealer Sai.

It was replaced with a fuse of the same specified capacity fuse , Please.

It has been described in the installation location of the fuse Please be careful that.

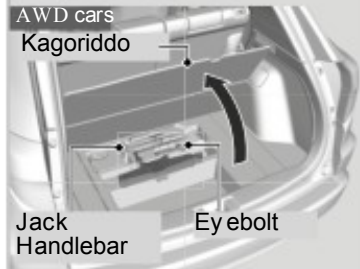

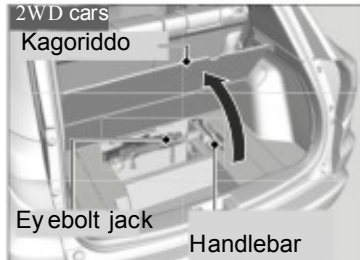

Fuse box in the engine room A in the, Fuse puller is attached to the back of the lid. Fuse puller, small Hugh you are off Use when removing the figure.

Traction of emergency

Traction it, ask the professional 2WD cars front wheel or four-wheel, AWD di four-wheel vehicles is
Please follow up blood.

■ If you are forced to tow

When performing the tow rope and grounds the forced four-wheel, it will be performed in the following ways:
Please.

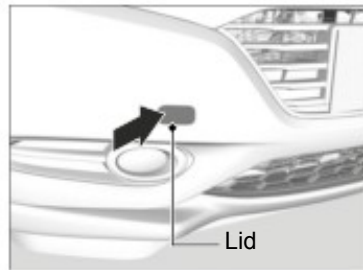

1. transmitter from the bottom of the engine room
Tion fluid (oil) and is leaking
I will confirm that no.
u If there is an abnormality, the front-wheel or Does not have.
The Do not attempt to tow by ground
Sai.
2. opened the Kagoriddo, jack Hand
I take out the eye bolt and bar.

The abnormality in the power transmission device, such as
when the wheel does not work
When you believe that there is, 2WD cars also four-wheel
Front wheels, AWD vehicles towing Lift the four-wheel
Please

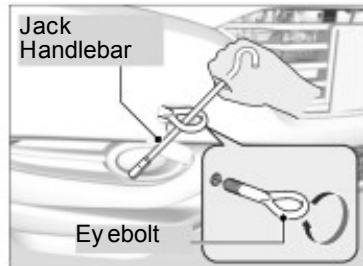

Advice

You can lift a car bumper, towing
And, bumper will be damaged significantly.
Bumper is able to support the weight of the car

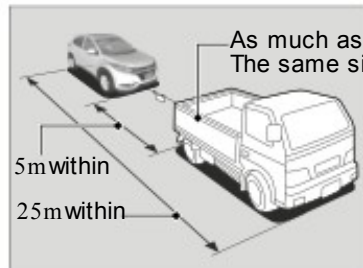

Does not have.

3. Remove by pushing the left side of the lid.

4. by hand to the extent not rattle the eyebolt
After tightening, jack handle bar
At I tighten securely .

5. was applied to the eye bolt rope, rope center
6. the select lever over the engine To
then, about 5 to hold seconds.

u If the engine does not start, the Power
Or accessories mode mode is ON
I want to mode.

1 tow of emergency

Advice

It is not multiplied by the rope at the other eyebolt
Please de.
There are cases where the body is damaged, it is deformed.

In the long downhill, and Department of the brake temperature
Note there is a possibility that the lake will not work
At, it is sure to ask them to tow the tow truck
Have.

Advice

traction while the engine is stopped,
Please note the following.
• Since the booster of the brake does not work, parts
Effectiveness of the lake is poor
• Power unit of the power steering is activated Na
Fried steering becomes heavy
• there is a risk of transmission may be damaged

7. the select lever **N**(neutral) I want to.

8. I to release the parking brake.

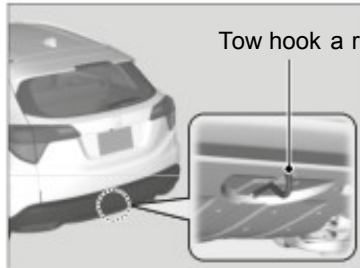

9. tow.

u tow in, so as not to slacken the rope with care to the brake light of the car in front

Please.

u speed 30km/ h or less, mileage 80km Please towing limit.

■ **If you want to tow another vehicle forced**

Tow hook a rope to tow hooks on the bumper under

When performing the towing of other vehicles forced rear

Please over.

1 If you are towing another vehicle forced

Advice

Do not put the rope at the tow hook other than

Please do not.

There are cases where the body is damaged, it is deformed.

When you tow with a rope or chain, such as

, Please wrap the cloth in part to hit to the body.

When you tow as it is, be scratched on the body

I There is.

Please avoid towing the car heavier than the vehicle.

The idling stop system OFF in the

Please.

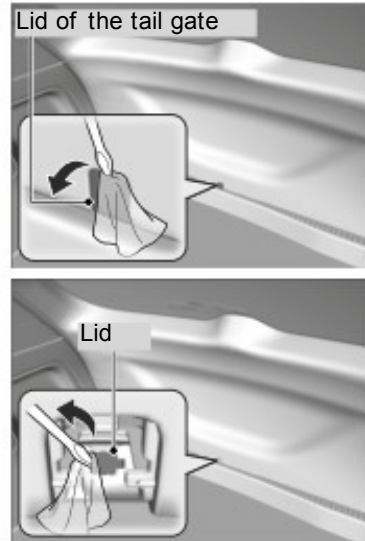

2 idling stop system OFF switch

P.160

when the tail gate does not open

■ What to do if you do not want to open

Event, when it is no longer able to open the tailgate, and next as first aid
Please open way of.

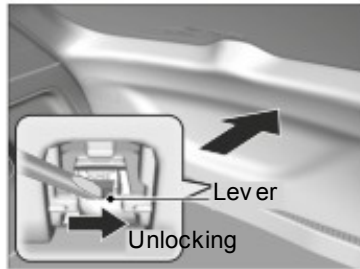

1. to the lid of the tailgate, and minus Dora
Insert the tip of the optic, and remove.
u so that the lid is not scratched, driver
Please wrapped in a cloth.
2. to the lid of the lock part of the tailgate,
Insert the tip of a flat head screwdriver,
I open the lid.
u so that the lid is not scratched, driver
Please wrapped in a cloth.

The one what to do if that does not open

C

When opening from inside the tailgate, oxalic
Enough space in the rear and above the car and
the safety of the range.
Make sure that there is the nest.
The late to the injury which is not likely to run into
trees and people

The first aid post, Honda by receiving inspection dealer
Please.

3. Move to the right lever using a screwdriver
In the state of the remains, open it and press the tailgate Kick.
